coffee/tea)

12:30 Wrap up

13:00 Lunch

What happens when clients place their mental distress in the body? Skin conditions like psoriasis and eczema; hair conditions like trichotillomania; problems relating to the colon; body odours. All these can emerge, and in themselves seem like the pathology.

Suzanne Goldstein and Judy Russo will present case studies that explore the messages from the gut and from the head.

This session will interest practitioners in private and NHS settings, as well as trainees...
